

# About your membership certificates

Your members' new membership certificates are printed using a "blackletter" style typeface known as *Cloister Black*. This typeface features traditional character forms (glyphs), and some of them may create the illusion that names have been misspelled or that capital and lowercase letters have been exchanged - even if they haven't. If a member returns his or her certificate due to a misspelling or missed capital, please check the certificate against the following chart before requesting a replacement from the National Office.
